

Parent Workshop

**Schoology,
Microsoft, and so
much more!**

**This session will help you and your child succeed in the
2021-22 school year.**

There will be three sessions to provide support for families as we prepare to navigate the new school year.

Parents will learn how to access Schoology, the information learning hub for our students, to stay informed, review student work and assignments, and utilize Microsoft tools to support student success.

We will share ideas for engaging with your child's school and teachers throughout the year.
